ACCUMULATED % RETAINED
MESH  MAXIMUM  MINIMUM  AVERAGE
1/2  0.00  0.00  0.00
3/8  5.00  0.00  2.00
1/4  25.00  10.00  18.00
8  80.00  50.00  65.00
14  90.00  60.00  78.00
30  100.00  85.00  90.00

COMMENTS
This grade is designed to meet most Highway Department specifications for De-Icing and is normally made by blending "Medium", "C-Fine", and "Fine" to meet ASTM specifications, Type I, grades 1 and 2.
Anti-caking agent (YPS) is usually added, at approximately 200 ppm, unless otherwise specified.
It is available in bulk, or in 50, 80 & 100 # multiwall bags.
Size and quality variations do occur in this grade, depending on method of production.
** The degree of slope of the applicable screen causes a reduction of the size opening applied to the product.
For general size reference use apparent openings.

AB PERSONNEL
If any samples test outside the indicated ranges, immediately check for broken or blinded screens, then check sampling procedures and production area.
